R. H. GORE - ORCHIDS
 Box 211 - Fort Lauderdale, Florida
 FALL LIST 1951

Our current seed and seedling list offers the best in quality.

The Vanda and Dendrobium flascom seedlings will be shipped directly from Hawaii to you. The flascom seedlings are seedlings which are removed from flasks and are ready to plant into community pots when you receive them. You will receive enough seedlings to plant an average of five three-inch community pots. Therefore your community pots will cost you a little over \$3. each. The Vanda and Dendrobiums are from a fine, selected stock and were hybridized with forethought and planning to produce outstanding hybrids. The Vanda and Dendrobium flascoms will be sent via Air Parcel Post, Prepaid. All other seedlings will be shipped by the carrier you desire, collect.

All orders are payable before shipment in U. S. Dollars, Money Order, check or cash via registered mail.

SEED NOW AVAILABLE

Please state second and third choices, in the event the seed has been sold. All prices listed are for the three-flask size.

INFORMATION

All plants, seed and seedlings will be shipped according to your instructions. Please check your shipment preference. All shipments will be sent collect within the continental United States.

Prepayment is required on all packages sent via mail and on all shipments outside the boundaries of the United States. We shall prepay these shipments and forward you a statement on the shipping charges. Prompt payment to us for this service will be appreciated.

All orders are payable before shipment in U. S. dollars; money order, check or cash via registered mail.

Once the shipment is in the possession of a foreign carrier we assume no further responsibility. We shall pack with our usual care to help insure safe delivery. Any shipments arriving damaged should be brought to the attention of the carrier in order that you may present claim of damage to the carrier.

All items listed are subject to prior sale.

No substitutions will be made on your order without instructions from you.

VANDA FLASCOMS

These flascoms contain over 150 large sturdy seedlings ready for communities with some ready for thumb pots.

\$17.50 per flascom shipped prepaid via air parcel post.

Unsatisfactory shipments will be replaced if returned within one week after receipt.

- | <u>No.</u> | <u>Cross</u> |
|------------|---|
| 220 | V. Sanderiana x V. Sanderiana
V. Sanderiana (specie) is a large, heavy textured, two-toned flower of very good conformation. The upper half of the flower is blush pink with the lower half reticulated and straited with various shades of brown. Two fine V. Sanderianas averaging 3-7/8" x 4 1/2" were used, producing as the result of this cross, many superior V. Sanderianas. |
| 286 | V. Merrillii x V. Sanderiana = V. MARY FOSTER
V. Merrillii is a specie with small deep red brown flowers. See 220 for V. Sanderianas. V. Mary Foster is a golden brown hybrid with profuse spottings and markings of red-brown. |
| 140 | V. Sanderiana x V. Mem. T. Iwasaki
V. Mem. T. Iwasaki (V. Dearei x V. Tricolor) is a medium sized yellow, spotted with red brown. See 220 for V. Sanderiana. Blooms of this cross will be yellow to greenish yellow with brown markings and spottings. |
| 159 | V. Sanderiana x V. Amcena
V. Amcena (V. Roxburghii x V. Coerulea) is blue, marked with linings of deeper blue. See 220 for V. Sanderiana. Expect good sized blues. |
| 343 | V. Sanderiana x V. Ohuchu
V. Ohuchu (V. Clara S. Fisher x V. Sanderiana.) The V. Ohuchu used was similar to V. Sanderiana in coloration but of a better shape. See 220 for V. Sanderiana. V. Sanderiana like flowers are expected but there should be some interesting variations, too. |
| 379 | V. Sanderiana x V. Honolulu
The V. Honolulu (V. Frank Scudder x V. Sanderiana) used was a very large, flat, dark strawberry colored bloom, with darker spottings and reticulations. See 220 for V. Sanderiana. Expect large, deep rose-pinks. |
| 382 | V. Sanderiana x V. Joan Swearingen
The V. Joan Swearingen (V. Luzonica x V. Rothschildiana) used was a deep pink, with strawberry red spottings and flushings. See 220 for V. Sanderiana. Results should be a good sized dark rose-pink with darker spottings and markings, but there should be a few blue segregants. |
| 600 | V. Sanderiana x V. Rothschildiana = V. ONOMEA
V. Rothschildiana (V. Sanderiana x V. Coerulea) is a very large, flat, deep blue with darker reticulations. See 220 for V. Sanderiana. Result to be from blues, pinks, to peach. One of the best of the newer hybrids. |
| 609 | V. Sanderiana x V. Piihouna
The V. Piihouna (V. Clara S. Fisher x V. Coerulea) used was a large, blue with darker reticulations. See 220 for V. Sanderiana. Results should be a fine large, flat blue with some pink segregants. |
| 358 | V. Sanderiana x V. Ellen Noa
V. Ellen Noa (V. Dearei x V. Sanderiana) is a large, cream-buff flower spotted with red brown. This cross should produce excellent cream, buff-to-pink tinged flowers, large, flat and of good conformation. |
| 632 | V. Sanderiana x V. Hookeriana = V. PRINCESS ELIZABETH
V. Hookeriana (specie) is a terete vanda, pink with strawberry spottings and a large spade lip of deep red. The resultant semi-terete V. Princess Elizabeth is large, pink with a bright pink-red lip. See 220 for V. Sanderiana. |
| 455 | V. Luzonica x V. Sanderiana = V. MANILA
V. Luzonica (specie) is white with red spottings and flushings. See 220 for V. Sanderiana. V. Manila is a fine, large, flat, pink spotted and reticulated with red. Prolific and floriferous. |

... plants were certainly over 100 large shrubby seedlings ready for
communities with some ready for large pots.

\$17.50 per plant shipped prepaid via air parcel post.

Quarantary shipments will be replaced if returned within one week
after receipt.

V. ... x V. ...
V. ... (specie) is a large, heavy branched, two-toned flower of
very good constitution. The plant is in first pink light
the lower half notated and striped with various shades of brown.
Two fine V. ... x 4 1/2" x 4 1/2" were used, producing as
the result of this cross, many superior V. ...

V. ... x V. ... = V. ...
V. ... is a cross with ...
for V. ... V. ... is a golden brown hybrid with various
spots and markings of red-brown.

V. ... x V. ...
V. ... (V. ... x V. ...) is a medium sized yellow
spotted with red brown. See 230 for V. ... flowers of this
cross will be yellow to greenish yellow with brown markings and spots.

V. ... x V. ...
V. ... (V. ... x V. ...) is blue, marked with tints of
purple blue. See 230 for V. ... flowers of this
cross will be yellow to greenish yellow with brown markings and spots.

V. ... x V. ...
V. ... (V. ... x V. ...) is a better shade. See 230
for V. ... V. ... like flowers are expected for this
cross should be some interesting variations, too.

V. ... x V. ...
The V. ... (V. ... x V. ...) used was a very large,
first, dark strawberry colored form, with darker spots and red
tints. See 230 for V. ... flowers, most large, deep rose-red.

V. ... x V. ...
The V. ... (V. ... x V. ...) used was a
deep pink, with strawberry red spots and tints. See 230 for
V. ... flowers should be a rose shaded dark rose-pink with darker
spots and markings, but there should be a few blue segments.

V. ... x V. ...
V. ... (V. ... x V. ...) is a very large, first,
deep blue with darker red spots. See 230 for V. ... flowers
to be from blue, pink, to green. One of the best of the lower hybrids.

V. ... x V. ...
The V. ... (V. ... x V. ...) used was a large,
blue with darker red spots. See 230 for V. ... flowers
should be a fine large, light blue with some pink segments.

V. ... x V. ...
V. ... (V. ... x V. ...) is a large, cream-white flower
spotted with red brown. This cross should produce excellent cream,
buff-to-pink tinged flowers, large, flat and of good constitution.

V. ... x V. ...
V. ... (specie) is a large, pink with strawberry spotted
and a large space of deep red. The red tints are ...
flowers; likewise is large, pink with a bright pink-red tip. See 230
for V. ...

V. ... x V. ... = V. ...
V. ... (specie) is white with red spots and tints. See 230
for V. ... V. ... is a fine, large, flat, pink spotted
cross should be red, white and blue.

VANDA FLASCOMS - continued 1

- 363 V. Walter F. Dillingham x V. Sanderiana
The V. Walter F. Dillingham (V. Emily Notley x V. Rothschildiana) used was light cream pink with darker pink spottings and tessellations. See 220 for V. Sanderiana. Color range should be like that of the rainbow. Pinks predominating.
- 175 V. Sanderiana x V. Dearei = V. ELLEN NOA
V. Dearei (specie) is an even colored buff of good size. See 220 for V. Sanderiana. V. Ellen Noa is cream-buff, spotted with red brown. Lip yellow, tinged with green, a very large bloom.
- 408 V. Sumatrana x V. Sanderiana = V. HENRIETTA HO
V. Sumatrana (specie) is an even, waxy, dark olive brown flower with traces of yellow. Heavy textured and fragrant. See 220 for V. Sanderiana. V. Henrietta Ho is large, heavy textured, yellow background spotted and reticulated with various shadings of brown. Prolific.
- 503 - V. Manila x V. Gilbert Triboulet
See 455 for V. Manila. V. Gilbert Triboulet (V. Tricolor x V. Coerulea) is blue as the ocean with darker spottings and markings. Both parent plants are prolific and floriferous. Flowers should be pinks and blue-pinks.
- 508 V. Manila x V. Burgeffii
See 455 for V. Manila. V. Burgeffii (V. Suavis x V. Sanderiana) is two-toned with the upper half rose pink with red-brown spottings. The lower half is reticulated and striated with dark brown. Resulting blooms should be deep pink with darker spots and reticulations.
- 184 V. Suavis x V. Manila
See 455 for V. Manila. V. Suavis (specie) is white with maroon red spottings and splashings. Prolific, prolific and floriferous. Rose pinks to deep strawberry should be the predominating colors.
- 350 V. Henrietta Ho x V. Manila
See 455 and 408. Results should be similar to V. Manila with heavier red-brown markings.
- 375 V. Trimerrill x V. Manila
See 455 for V. Manila. V. Trimerrill (V. Tricolor x V. Merrillii) is rust-brown with traces of buff. Flowers should shade from brown to deep pinks.
- 504 V. Boschii x V. Manila
See 455 for V. Manila. V. Boschii (V. Tricolor x V. Luzonica) is white with strawberry spottings and splashings. Lip dark Pink. A fine pink should result.
- 378 V. Suavis x V. Chuchu
See 184 and 343. A two-toned deep rose pink and brown with red-brown spottings and markings should be the result.
- 345 V. Ellen Noa x V. Mary Foster
See 175 and 286. A very fine yellow to golden brown is expected, with darker spottings and reticulations.
- 506 V. Ellen Noa x V. Herziana
See 175 for Ellen Noa. V. Herziana (V. Suavis x V. Coerulea) is blue with darker striations and reticulations. Results should be varied from buff-green to deep blue.
- 344 V. Suavis x V. Ellen Noa
See 184 and 175. Resulting bloom should be predominantly buff with chocolate spottings and markings.
- 346 V. Trimerrill x V. Ellen Noa
See 375 and 175. Blooms from buff to light brown with red-brown spottings and splashings are expected.
- 360 V. Henrietta Ho x V. Ellen Noa
See 408 and 175. This should result in yellow-brown to red-brown flowers of very good form and texture. This should be one of the better new hybrids.

VANDA FLASCOMS - continued 2

- 376 V. Mem. G. Tanaka x V. Ellen Nca
See 175 for V. Ellen Nca. V. Mem. G. Tanaka (V. Mem. T. Iwasaki x V. Dearei) is yellow-brown with dark brown spotting and markings. Flowers should be large and flat with colors ranging from buff to light brown with spottings of darker red-brown.
- 361 V. Suavis x V. Mary Foster
See 184 and 286. A good reddish-brown flower with darker spottings and splashings is expected.
- 349 V. Mem. G. Tanaka x V. Mary Foster
See 376 and 286. Buff to red-brown flowers with red-brown spottings and markings should result.
- 116 V. Puna x V. Merrillii
See 286 for V. Merrillii. V. Puna (V. Tatzeri x V. Luzonica) is white with red splashings at tips of appendages. Flowers ranging from deep pink to red-brown are expected.
- 354 V. Boschii x V. Rothschildiana
See 504 and 600. Flowers should range from deep rose pinks to pink blues.
- 336 V. Mem. G. Tanaka x V. Rothschildiana
See 376 and 600. Medium sized flowers ranging from cream-pink to deep blues.
- 370 V. Henrietta Ho x V. Ohuchu
See 408 and 343. Large flat peach to greenish brown flowers are expected. Should be very nice.
- 599 V. Luzonica x V. Ohuchu
See 343 for V. Ohuchu. V. Luzonica (specie) is white with splashings of deep strawberry red at tips of appendages. The results should be similar to V. Manila, a very deep pink, almost a strawberry shade, with darker spottings and markings.
- 383 V. Ohuchu x V. Rothschildiana
See 600 and 343. Expectations are for flowers similar to V. Onomea - large, flat, excellent form, color range from peach, rose pink to blues.
- 509 Renanthera Storiei x Self
Renanthera Storiei is a vandaceous specie bearing many small blood-red blossoms in a cascading spray. Very showy.
- 399 V. Ellen Nca x Renanthera Storiei
See 175 and 509. Resulting blooms should be bright orange red. A very attractive hybrid.
- 601 V. Piihoua x Renanthera Storiei
See 609 and 509. Good sized flowers of deep violet red to blood reds should result.
- 364 V. Gilbert Triboulet x Renanthera Storiei
See 503 and 509. Medium sized flowers of deep red should result.
- 321 Renanthera Storiei x Vandopsis Lissochiloides = RENANOPSIS LENA ROWOLD
See 509 for Ren. Storiei. Vandopsis lissochiloides is a vandaceous specie bearing numerous yellow-green flowers heavily spotted with maroon. Back of appendages deep lavender. Very heavy textured. Renanopsis Lena Rowold is a medium sized blood-red flower borne on a long spray and very showy.
- 469 V. Flammerolle x V. Ohuchu
See 343 for V. Ohuchu. V. Flammerolle (V. Luzonica x C. Coerulea) is an even colored sky-blue with darker reticulations and striations. Blooms of this cross should be predominantly pink and of good size and conformation.
- 470 V. Flammerolle x V. Sanderiana
See 469 and 220. Results should be similar to 469, with blue segregants.
- 471 V. Manila x V. Rothschildiana
See 455 and 600. Flowers should result in a very fine, well shaped, large, very deep strawberry, to blue pinks with dark violet reticulations and markings.

VANDA FLASCOMS - continued 3

- 355 V. Suavis x V. Sanderiana = V. BURGEFFII
See 375 and 220 and 508. A very good commercial cross.
- 356 V. Trimmerill x V. Sanderiana
See 375 and 220. Flowers should be similar to V. Mary Foster, see 286.
- 335 V. Henrietta Ho x V. Sanderiana
See 408 and 220. Results should be cream to buff to a greenish yellow blooms with spottings and markings of red brown.
- 524 V. Henrietta Ho x V. Ohuchu
See 408 and 343. Results should be similar to 335 with very interesting variations.
- 630 V. Joan Swearingen x V. Henrietta Ho
The V. Joan Swearingen used was a large flat blue. The V. Henrietta Ho had a buff background with spottings and reticulations of henna. Results should show many different colors from buff to buff-green with perhaps some pink segregants.
- 649 V. Ellen Nca x V. Caroline J. Robinson
See 175 for V. Ellen Nca. V. Caroline J. Robinson is a small purplish-brown flower spotted with deep grey-green. Fragrant and prolific. Results should be cream to brown flowers with a suggestion of lavender and green. A very interesting hybrid. Very heavy textured.
- 365 V. Suavis x V. Honolulu
See 185 and 379. A good sized deep pink and variations should result.
- 629 V. Piihonua x V. Rothschildiana
See 609 and 600. A very large dark blue is expected. Similar to V. Rothschildiana. Should be a very fine cross.
- 452 V. Gilbert Triboulet x V. Sanderiana = V. Carole Hirano
See 503 and 220. Flowers are pink with darker reticulations.
- 271 V. Manila x V. Sanderiana = V. BILL SUTTON
See 455 and 220. Flowers are dark pink and take more of the Sanderiana characteristics in all respects.
- 605 V. Clara S. Fisher x V. Rothschildiana = V. FAIR QUEEN
See 600 for V. Rothschildiana. V. Clara S. Fisher (V. Tatzteri x V. Sanderiana) is variable in color from pink, buff to green. Crossed with the blue V. Rothschildiana the flowers have been a very dark strawberry to pink background with dark blue reticulations.
- 357 V. Boschi x V. Rothschildiana
See 504 and 600. Flowers should range from pink to blue with strawberry spots and dark blue reticulations. Should prove interesting.
- 700 V. Sanderiana x V. Trisher
The V. Trisher (V. Clara S. Fisher x V. Tricolor) used was a deep maroon with trace of pinkish markings. Thick textured and extremely showy. For Sanderiana, see 220. Results should be strawberry to deepest red-browns
- 304 V. Colorful x V. Sanderiana
See 220 for Sanderiana. V. Colorful (V. Insignis x V. Miss Joaquim) is a semi-terete, with salmon pink to deep red flowers. Expect good sized deep pink to red flowers of heavy texture.
